What would a peaceful community look like?

KS1
Term Autumn 2

WE ARE ALL PEOPLE, WE ARE ALL THE SAME.

Race – grouping of people together based on their visual features, most commonly skin colour.

Racism – when someone treats a person or a group of people unfairly or thinks that they are inferior because of the colour of their skin or “race”

Anti-racism – an ongoing active effort to challenge racism in society.

Stereotype – An idea or belief many (not all) people have about a thing or a group that is often based upon how they look on the outside and is often untrue.

Bias – means guessing something about someone else for no good reason.

Discrimination – being unkind to someone because of what they look like or something else that they didn't choose (gender, disability, family, skin colour and many more).

Why is racism so bad?

- 1) It hurts feelings – makes people feel sad, lonely and confused.
- 2) It is unfair – people can't do anything about who they are.
- 3) We should feel proud of what makes us different, unique and special.

How can we challenge racism?

- Say 'that's not right'
- Speak up calmly and respectfully (even though we may feel sad or angry)
- Make sure people know that we are an anti-racist.

Key Points:

- We must treat everyone fairly and kindly, no matter what they look like.
- Don't judge someone based on how they look.
- You can't tell what someone's personality will be like by looking at them.
- Being biased can cause lots of problems.

How can we stop racism at our school?

- Be kind to everyone.
- Tell an adult
- Include everyone when you play.

Vocabulary Tier 2

Race Racism
Anti-racism Stereotype
Bias Discrimination

THINK IT.

BELIEVE IT.

Vocabulary Tier 3

Empathy
Respect
Judgement
Inferior
