

### Prior learning

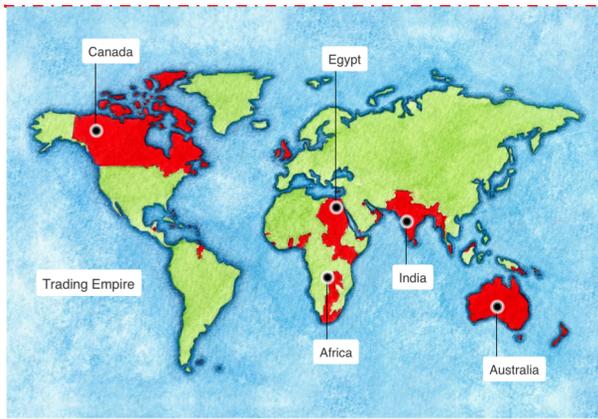

Counties, cities and regions of the UK

Aerial photographs and maps.

### Locate countries in the British Empire

**Innovation** Developing a new idea or product, such as new technology that saves energy.

**Infrastructure** Physical and organisational structures that help society, such as road, buildings, technology, electricity, clean water and communication.

**Industry** Economic activity that involves buying and selling products, factories and the manufacture of goods.

### What geographical features supported the Industrial Revolution?

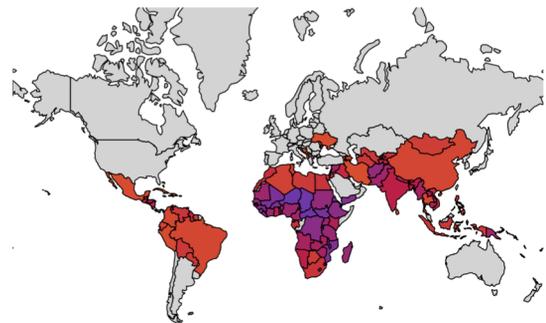

### How has communication evolved so we are connected around the world?

### Is all innovation good?

**Least developed countries:** Poor infrastructure, low education and literacy levels, and poverty.

### Vocabulary Tier 2

- Economy
- Roadways
- Affordable
