

Dyeing Fabric Using Natural Materials

These natural materials can be used as dyes.
 Add your choice of natural ingredient to a large pot, fill with water and bring to the boil. Leave for an hour for the colour to change.

To dye fabric:
 Add the fabric to the pot and leave to soak for a period of time. Remove the fabric from the pot and hang out until dry.

Tie Dye

Tie Dye
 A way of making colourful patterns on fabric. This can be done by folding, tying or crumpling fabric and applying the dye.

Chintz
 Chintz is woodblock printed, painted or stained textiles which originated in India. The textile painters or dyers have used resources from the surrounding environment to create colour. Turmeric has been used here to be made into yellow dye. Cloth is printed using designs like flowers.
