

Geography Learning Organiser – Year 2 Summer 2 – “How important is the High Street in Buckden?”

Prior Learning (What we already know?)

We know that different areas of Buckden are used for different uses e.g. allotments are on flat land, farms are in Buckden to produce food.

We know how to locate features of Buckden on an ariel photograph e.g. school, church, River Ouse

We know the geography of our school.

We know the 4 points of a compass

New Learning

To be able to identify different types of communities e.g. Buckden village community, a scientific community in Cambridge

To know how and why settlements change over time e.g. Buckden High Street

To explore different regions within the local area e.g. science parks

To explore connections between human activity and geography e.g. development of a science park

To explore the key features of a local area e.g. shops located in Buckden

New Geography Skills

To be able to locate Buckden on a digital map.

To be able to locate the High Street in relation to our school on a map.

To be able to locate The Science Park on a digital map.

To be able to compare The Science Park Location on a current map and on a map produced before 1970.

To be able to understand the similarities and differences of the human and physical geography of a small area of the United Kingdom e.g. Buckden High Street and Cambridge Science Park.

Key Questions

How would you compare the shops in Buckden to those in St Neots?

Can you list the places that people work in Buckden/St Neots/Cambridge?

What are the main places of work in our local area?

Why are shops important for employment?

What do you think happens in Cambridge Science Park Compare Buckden High Street on a current map and an older map?

What questions would you ask in an interview with a shoemaker?

Vocabulary

Communities, Settlements, Regions, Local Area, Human Activity, Key Features, High Street, Employment, Science Park, Craftsmen/women
